

**Job title:** Mechanical Technical Manager  
**Service line:** Technology Team  
**Based:** London, Amsterdam or Dublin (Flexible)  
**Reporting to:** Technical Director

### Job purpose

Yondr is revolutionising the real estate and technology industries. We provide wholly outsourced, end-to-end solutions to meet the capacity and property needs of growing businesses. In the process, we improve business performance, create enriching user experiences, and meet tomorrow's needs today.

But we can't do it without you.

We believe in a tomorrow without constraints and making the impossible possible for our clients. Thinking out of the box and not settling for less, is crucial.

### The role

As Mechanical Technical Manager, this role acts as a client-side stakeholder in the development and delivery of the mechanical systems for projects and operations. Delivered through internal and external resources, the role represents both client and internal Yondr needs.

You will take an active part in the strategic expansion and maintenance of technical governance, development of standard specifications, QA / QC procedures and continuous improvements. Bringing technical expertise and experience with the ability to think differently, challenge tradition and offer innovation and evolution to Yondr's unconstrained technical solutions.

### Main responsibilities

- / Accountable for delivery and quality mechanical system output
- / Become a Yondr subject matter expert interfacing with external parties and the end user(s)
- / Lead the conceptual system during early development stages
- / Contribute to technical innovation developing new business strategies

### Qualifications and experience

- / Commercial acumen appreciating impact of technically led decisions
- / Ability to take the lead in technical workshops and meetings
- / Ability to engage with suppliers and develop innovative solutions
- / Leadership of internal teams, external consultants and technical suppliers
