Job title:	Regional Design Manager
Service line:	Engineering
Based:	(Flexible) London, Amsterdam or Dublin
Reporting to:	Technical Director

Job purpose

Yondr is revolutionising the real estate and technology industries. We provide wholly outsourced, end-to-end solutions to meet the capacity and property needs of growing businesses. In the process, we improve business performance, create enriching user experiences, and meet tomorrow's needs today.

But we can't do it without you.

We believe in a tomorrow without constraints and making the impossible possible for our clients. Thinking out of the box and not settling for less, is crucial.

The role

As Regional Design Manager, you'll act as client-side stakeholder in the development and delivery of the design for Yondr's development projects. Delivered through internal and external resources representing both clients and internal Yondr needs.

You will take an active part in the strategic expansion of site selection, site specific design, technical strategy, development and implementation of Yondr's blueprint and continuous improvement. Brining technical expertise and experience with the ability to think differently, challenge tradition and offer innovation and evolution to Yondr's unconstrained technical solutions.

Main responsibilities

/ Accountable for design delivery and quality design output covering the EMEA region
/ Yondr design lead with multidisciplinary external parties and the end user(s)
/ Lead the integrated design delivery from inception through construction
/ Lead internal discipline managers in developing the site specific data center design
/ Contribute to technical innovation developing new business strategies and Yondr DC blueprint
/ Lead the design development, planning, site design

Qualifications and experience

/ Commercial acumen appreciating impact of technically led decisions
/ Ability to take the lead in technical workshops and meetings
/ Ability to engage with suppliers and develop innovative solutions
/ Leadership of internal teams, external consultants and technical suppliers
/ Experience in holistically delivering project design within a developmental organisation
